

IMPLEMENTATION WORKSHOP

The Camp Invention® **Implementation Workshop** provides educators with all the tools and training for a turnkey summer program, as well as strategies to continue the momentum in the school year.

This workshop introduces the foundational concepts and methodology found in National Inventors Hall of Fame® (NIHF) programming, including the create, test and recreate approach, STEM application to inspire creativity and innovation, and introductions to real-world inventors, our NIHF Inductees.

Through hands-on activities and guided peer collaboration, participants will gain inspiration and strategies for implementing an exciting, hands-on experience during the summer and beyond.

The Camp Invention Implementation Workshop inspires your educators through:

- **Preparation for the Camp Invention program**, including an introduction to activities and a review of instructor guides, schedules and program curricula
- **Hands-on workshop activities** encouraging educators to apply critical thinking and creative problem solving while building STEM knowledge and teaching practices to emphasize teamwork, innovation and self-directed learning
- **Transference methods** to utilize concepts of the innovation mindset in creating an immersive environment that empowers students to realize their potential to solve real-world challenges
- **Stories and insights** on intellectual property (IP), entrepreneurship, collaboration and invention from NIHF Inductees, embedded in Camp Invention curricula
- Experience in **facilitating inquiry and questioning strategies** for a challenging and rewarding experience supporting student engagement

NIHF professional development workshops are customizable to support district objectives and needs.
